

## Part 1:

**Line #:** 1     **Error:** checkError.sh: line 1: 0/bin/bash: No such file or directory

**Correction:** Change the line to #!/bin/bash

**Line #:** 2     **Error:** checkError.sh: line 2: /1: Permission denied     **Correction:** Comment the line by removing the Java-like comment macros and adding a # in front of it.

**Line #:** 7     **Error:** It doesn't search with `[^a]*ce`, since there's another ^ in the beginning.     **Correction:** Remove the ^

**Line #:** 13     **Error:** -ENDHERE should just be END     **Correction:** Turn it into END

**Line #:** 17     **Error:** Doesn't send to my email     **Correction:** Turn it to mail  
\${1}@student.gsu.edu

## Part 2:

```
#!/bin/bash
```

```
echo Welcome, Society of Computer Scientists
```

```
# Name: David Louis Roy II
```

```
# E-mail: droy4@student.gsu.edu
```

```
echo "Current date: $(date)"
```

```
echo "Number of directories in /home: " $(ls -l /home | grep -c ^d)
```

```
echo "Path: $(printf "%s\n" $PATH)"
```

```
echo "User: $(printf "%s\n" $USER)"
```

```
echo "Shell: $(printf "%s\n" $SHELL)"
```

```
echo "Disk usage: $(df)"
```

```
echo "Please, could you loan me $25.00?"
```

```
echo "if x = 2, x * x = 4, x / 2 = 1"
```

```
echo "Listing all files that start with a 'c' and end with '.sh': $(ls | grep -E  
'^c.*(\.sh$)')"
```

```
echo "Goodbye. The hour is $(date +%I)"
```
